LEGO Serious Play

The **LEGO SERIOUS PLAY** methodology is an innovative process designed to enhance innovation and business performance. Based on research which shows that this kind of hands-on, minds-on learning produces a deeper, more meaningful understanding of the world and its possibilities, the methodology deepens the reflection process and supports an effective dialogue.

There are four essential steps to the process:

1. Participants are lead through a series of questions, which go deeper and deeper
2. Each participant builds their own 3D LEGO model in response to the facilitator's questions
3. These 3D models serve as the basis for group discussion, knowledge sharing and problem solving
4. The purpose of LEGO Serious Play is to maximise the full potential, insight, confidence and commitment of all participants
